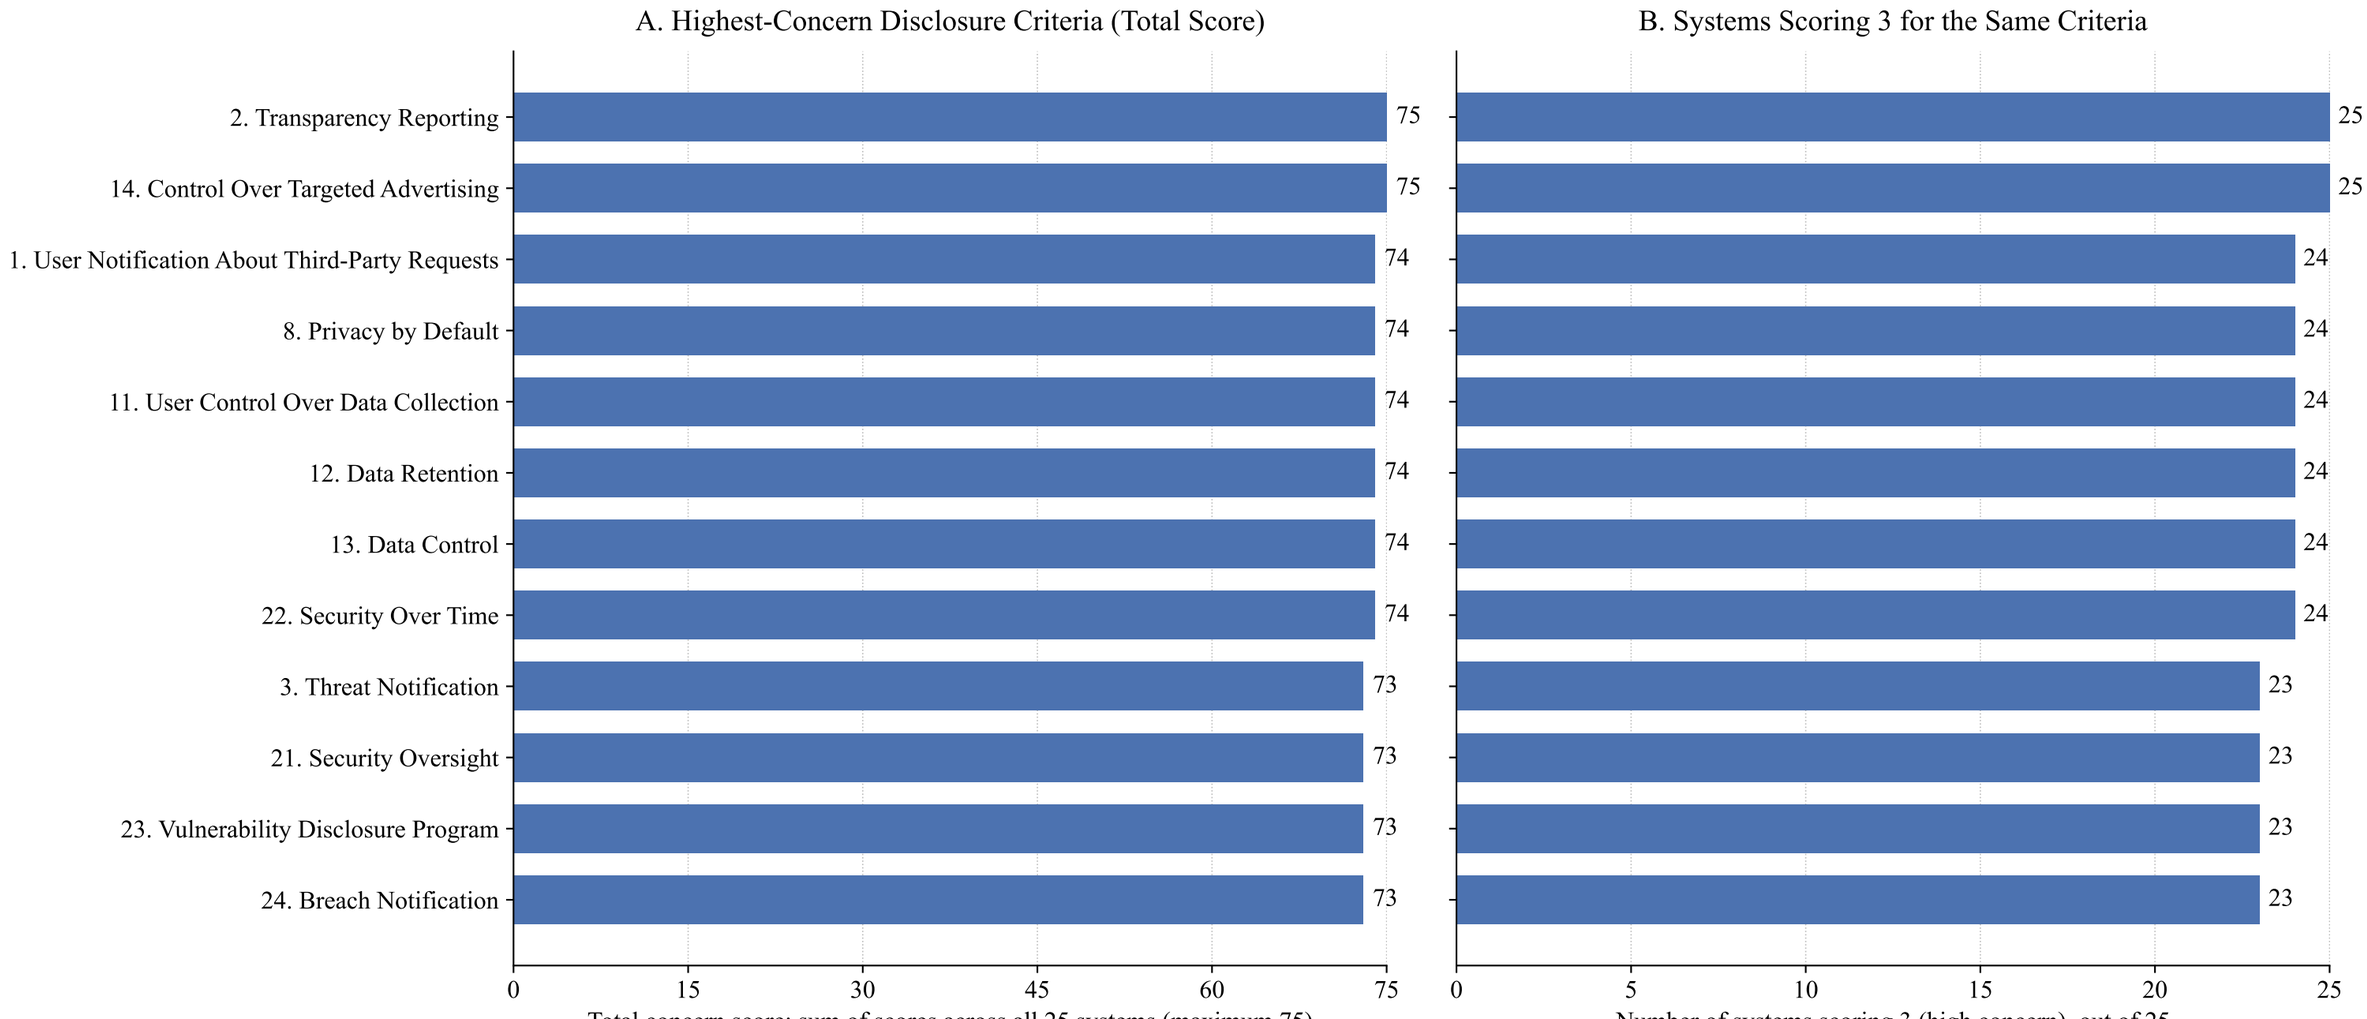
Figure 3. Highest-Concern Disclosure Criteria Across Implantable Neuromodulation Systems (IFU scoring matrix).



Criteria shown are the 10 with the highest total scores across all 25 systems (ties ordered by number of systems scoring 3, then criterion number); criteria are listed in the same order in both panels.
Because 4 criteria share the 10th-ranked total score (73), 12 criteria are shown; the additional criteria (ranked after the 10th by number of systems scoring 3) are: 23. Vulnerability Disclosure Program, 24. Breach Notification.
