Table 2. Disclosure Concern Scores by Governance Dimension, Overall and by Neuromodulation Type.

	All systems (n = 25)		Mean score by neuromodulation type				
Governance dimension	**Mean**	**Median**	**DBS (n = 3)**	**SCS (n = 6)**	**VNS (n = 3)**	**RNS (n = 1)**	**Peripheral (n = 14)**
Transparency (criteria 1-4)	2.76	2.75	2.58	2.88	2.75	2.25	2.82
Data Collection Purpose (criteria 5-9)	1.66	1.60	1.60	1.63	1.60	1.60	1.69
Data Minimization (criteria 10-12)	2.13	2.00	2.11	2.11	2.00	2.33	2.21
User Control and Rights (criteria 13-16)	1.91	1.75	1.83	1.96	1.67	1.75	2.00
Third-Party Data Sharing (criterion 17)	1.36	1.00	1.00	1.17	1.33	2.00	1.50
Data Security (criteria 18-23)	2.76	2.83	2.72	2.78	2.83	2.33	2.81
Breach Notification (criterion 24)	2.64	3.00	2.67	3.00	2.00	2.00	2.71
All 24 criteria (overall)	**2.25**	**2.21**	**2.17**	**2.28**	**2.17**	**2.04**	**2.31**

Scores range from 1 (low concern) to 3 (high concern). A system's dimension score is the mean of its criterion scores within the dimension; Mean and Median are taken across all 25 systems, and type columns show the mean across systems of that type. Systems labeled SCS, Peripheral are counted in both the SCS and Peripheral groups. The final row uses all 24 criteria (system total score divided by 24). DBS, deep brain stimulation; SCS, spinal cord stimulation; VNS, vagus nerve stimulation; RNS, responsive neurostimulation.
